Andrew Zheng

andrew.zheng1@uwaterloo.ca | in/andrewzheng2007 | github.com/awzheng | awzheng.me | Portfolio

Education

University of Waterloo | *BASc, Computer Engineering* | GPA: 3.9 Sep 2025 – Apr 2030

Skills

Languages: C, C++, Python, Golang, Verilog, Java, SQL, HTML, CSS, JavaScript, TypeScript, Bash
Embedded/Hardware: Altium Designer, KiCad, CAN, UART, I2C, SPI, Oscilloscope, Logic Analyzer
DevOps/Tools: AWS (Lambda, S3, IAM), Docker, Git, Jupyter, QEMU, Virtualization, VMWare Fusion, Linux
Libraries/Frameworks: FastAPI, React, MongoDB, Streamlit, NoSQL, REST API, Tailwind CSS, Next.js

Experience

Embedded Systems Designer | Waterloo Rocketry | Waterloo, ON Sep 2025 – Present

- **RocketCAN Remote Arming System** (GitHub) | *Safety-critical KiCad PCB*
  - Engineered schematic and PCB layout for dual LiPo inputs and discrete P-MOS high-side switching topology
  - Implemented passive gate biasing for recovery system arming during MCU high-impedance failure states
- **Remote Arming Firmware** (GitHub) | *C Firmware for PIC18*
  - Implemented low-level **C** firmware for **PIC18** to aggregate UART altimeter telemetry onto the **CAN** bus
  - Tested and debugged real-time ADC health monitoring and pyro continuity via logic analyzers and oscilloscopes

Hardware Designer | UW Biomechatronics Design Team | Waterloo, ON Sep 2025 – Present

- **EMG Fabric Arm PCB** (GitHub) | *Bionic Arm PCB in KiCad and Altium Designer*
  - Spearheaded migration to **Altium**, engineering an **ESP32**-based control system with **USB-C** connectivity
  - Validated electromechanical integration by collaborating on design constraints in **SolidWorks** for seamless fit

Case Competition Coach | Self-employed Jun 2024 – Present

- Scaled self-founded coaching business from contract work to fully independent, achieving **5-figure revenue**
- Developed curriculum for 150+ secondary school students across 10+ schools, leading to 50+ international qualifiers, 30+ finalists, and 33% (4/12) of Team Ontario's **1st-place** finishes at ICDC 2024

Projects

SageWall | ML Cloud Security System (GitHub) | *AWS, Python, Streamlit, Machine Learning* Dec 2025

- Architected a serverless Intrusion Detection System (IDS) deployed as a **SageMaker** endpoint using an **XGBoost** classifier, analyzing network traffic with **99.9%** classification accuracy and **<100ms** inference latency
- Engineered and automated the ETL pipeline using Lambda to transform raw network logs in S3, processing **125,000+** records from the NSL-KDD dataset and provisioning infrastructure via AWS SDK (Boto3)
- Deployed a Streamlit web dashboard for real-time system observability, secured with AWS IAM policies, using CloudWatch to monitor system health and triggering SNS security threat alerts via email

CrawlStars | Concurrent Search Engine (GitHub) | *Golang, MongoDB, REST API, Concurrency* Dec 2025

- Engineered concurrent web crawler with custom HTTP client using scalable producer-consumer architecture with parallel goroutines and buffered channels, processing **2000+ pages**/minute with **<15MB** memory usage
- Optimized high-concurrency pure **Golang** backend with thread-safe deduplication using sync.Map and atomic operations, enabling O(1) (constant-time) lookup for **50,000+** URLs and filtering **70%** of redundant crawls
- Developed a relevance ranking algorithm using MongoDB Atlas Search integration with aggregation pipelines and fuzzy query matching to map SEO relevance metrics to a 5-star rating system

Mangaroo | PDF-to-Manga AI Illustrator (GitHub) | *FastAPI, Python, REST API, Generative AI* Nov 2025

- Architected an asynchronous REST API orchestrating an agentic pipeline (**Gemini 1.5 Pro** + **Imagen 3**) using **FastAPI**, handling **1000+ concurrent sessions** to process **250+ page** novels and **50MB** input
- Engineered Story Bible context system with structured JSON prompting and session-scoped caching, reducing token usage by **92%** (1.4M to 100K per 100 pages) while maintaining O(1) memory complexity vs. O(n) alternatives

Awards

1st Place World Champion (Marketing – Product Management) | *DECA ICDC @ Los Angeles* Apr 2024
7x National Honour Roll | *University of Waterloo CEMC Mathematics Contests* 2020 – 2024
